#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 8 is objected to because of the following informalities: the word "code" is missing after the word "executable" in line 1 of the claim. Appropriate correction is required.
2. Claims 9-14 are objected to as being dependent upon an objected to claim.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Gadbois et al. (US Patent Application Publication 2004/0002955 A1) ('Gadbois').

With respect to claims 1 and 8, Gadbois teaches:

arranging business entity object(s) under user object(s) (elements 210, 222 and 224 in Figure 2, paragraphs 26 and 27); and

arranging corresponding tModel object(s) under at least one of user object(s), repository object and prefix (paragraph 39).

With respect to claims 2 and 9, Gadbois teaches further comprising arranging publisher assertion object(s) under business entity object(s) (elements 222, 224, 252 and 282 in Figure 2, paragraphs 28-29).

With respect to claims 3 and 10, Gadbois teaches further comprising providing service projection object(s) under business entity object(s) (elements 222, 224, 242 and 272 in Figure 2, paragraph 28).

With respect to claims 4 and 11, Gadbois teaches wherein the service projection object(s) is implemented as an alias (elements 242, 243, 244, 245 and 246 in Figure 2, paragraphs 28 and 29).

With respect to claims 5 and 12, Gadbois teaches further comprising first field(s) as attributes of publisher assertion object(s) (elements 254 and 284 in Figure 2, paragraph 33).

Gadbois teaches that publisher assertion names (PublisherAssertion1 and PublisherAssertion2) and publisher names (Publisher1 and Publisher2) are attributes of publisher assertion object(s).

With respect to claims 6 and 13, Gadbois teaches further comprising representing a keyed reference by an auxiliary class (paragraphs 38-39).

Gadbois discloses that a fromKey, toKey, and keyedReference are all included when publisher assertions are added to a directory information tree (DIT). One having ordinary skill in the art recognizes that these included attributes represent an auxiliary class because they are added to publisher assertion objects instances rather than to the entire class of objects.

With respect to claims 7 and 14, Gadbois teaches further comprising providing a distinguished name of an object revealing a chain of ownership and control for the object (Figure 2, paragraphs 27-29).
